Part II.
SUBSTANCE OF INTERVIEW DESCRIBING THE GENERAL NATURE OF WHAT WAS DISCUSSED:

The examiner contacted the applicant's representative to suggest the claim amendments currently presented in the attached examiner's amendment. The changes were proposed to clarify the geometry being claimed with respect to the visibility of light emitted from the device. "Each of" was removed from the claim because light from the units collectively can be seen, but the optical interfaces would prevent light from a single light unit being seen at a side opposite the optical interface. "Any azimuth direction ..." was suggested to read "every azimuth direction..." to clarify that light is filling a three dimensional space defined by the spherical coordinates and not simply visible from a single predetermined point. The applicant's representative conferred with the applicant and accepted the proposed changes.

Part III.

- ☒ It is not necessary for applicant to provide a separate record of the substance of the interview, since the interview directly resulted in the allowance of the application. The examiner will provide a written summary of the substance of the interview in the Notice of Allowability.
☐ It is not necessary for applicant to provide a separate record of the substance of the interview, since the interview did not result in resolution of all issues. A brief summary by the examiner appears in Part II above.
